DETAILED ACTION

1. This office correspondence is response to the applicant's after response filed on 04/11/2008.

Allowable Subject Matter

2. Claims 1-18 are allowed. The following is an examiner's statement of reasons for allowance: In interpreting the claims, in light of the Specification and the applicant's amendments filed on 04/11/2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record.
3. Sutton (US Patent Publication 20030196096) is concerned with "receiving and storing the patch data, receiving the encrypted control message, decrypting the encrypted control message and installing the patch data in the memory".
4. Bantz (US patent 7174017) is concerned with "using the public key to decrypting the encrypted control message".
5. However the totality of each element and/or step in claims 1-18 are not alluded to in the combined art of Sutton and Bantz. Their teachings either individually or in combination failed to teach or suggest the method recited in claim 1. More specifically, the combination of Sutton and Bantz does not teach or suggest "selecting a current public key from a list of public keys stored in a non-volatile memory of the apparatus, deactivating the current public key such that a different public key is used to decrypt a next control message" as recited in claim 1. Similarly, the combination of Sutton and Bantz does not teach or suggest "for a subsequent patch data and encrypted control message using a subsequent public key selected by the apparatus from the list of public

keys stored in the non-volatile memory, the subsequent public key being different from the current public key deactivated in previous step" as recited in claim 1. Accordingly, claim 1, and 15 is allowable over the combination of Sutton and Bantz. So, Claims 1-18 are allowable by virtue of their dependency upon claim 1, and 15 and also due to additional limitations recited in these claims. Therefore, for the foregoing reasons, examiner withdraws of the rejection of claims 1-18 under 35 USC §103(a) as being obvious over Sutton in view of Bantz.

6. However, the prior art of record fails to teach or suggest some of the steps of the present claim invention. Examiner performed an updated search and unable to find any prior art to disclose all the steps mentioned in the independent claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

8. Claims 1-18 are patentable.
